

Energy performance certificate (EPC)

24, Kingsdown Park WHITSTABLE CT5 2DE	Energy rating E	Valid until:	12 November 2029
		Certificate number:	9178-5953-6259-6691-2974

Property type	Detached house
Total floor area	65 square metres

Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Energy rating and score

This property’s energy rating is E. It has the potential to be C.

[See how to improve this property’s energy efficiency.](#)

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Wall	Timber frame, as built, no insulation (assumed)	Very poor
Roof	Pitched, 100 mm loft insulation	Average
Window	Mostly double glazing	Average

Feature	Description	Rating
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer and room thermostat	Average
Hot water	From main system	Good
Lighting	Low energy lighting in 9% of fixed outlets	Very poor
Floor	Suspended, no insulation (assumed)	N/A
Secondary heating	Room heaters, dual fuel (mineral and wood)	N/A

Primary energy use

The primary energy use for this property per year is 419 kilowatt hours per square metre (kWh/m²).

► [About primary energy use](#)

Additional information

Additional information about this property:

- Cavity fill is recommended

How this affects your energy bills

An average household would need to spend **£1,068 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £357 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2019** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 11,950 kWh per year for heating
- 2,527 kWh per year for hot water

Impact on the environment

This property's environmental impact rating is F. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO₂) they produce each year.

Carbon emissions

An average household produces	6 tonnes of CO ₂
This property produces	5.0 tonnes of CO ₂
This property's potential production	2.1 tonnes of CO ₂

You could improve this property's CO₂ emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Steps you could take to save energy

► [Do I need to follow these steps in order?](#)

Step 1: Cavity wall insulation

Typical installation cost	£500 - £1,500
---------------------------	---------------

Typical yearly saving	£111
-----------------------	------

Potential rating after completing step 1	49 E
--	------

Step 2: Floor insulation (suspended floor)

Typical installation cost	£800 - £1,200
---------------------------	---------------

Typical yearly saving	£54
-----------------------	-----

Potential rating after completing steps 1 and 2	52 E
---	------

Step 3: Low energy lighting

Typical installation cost	£100
---------------------------	------

Typical yearly saving	£41
-----------------------	-----

Potential rating after completing steps 1 to 3	54 E
--	------

Step 4: Heating controls (thermostatic radiator valves)

Heating controls (TRVs)

Typical installation cost	£350 - £450
---------------------------	-------------

Typical yearly saving	£30
-----------------------	-----

Potential rating after completing steps 1 to 4

55 D

Step 5: Replace boiler with new condensing boiler

Typical installation cost

£2,200 - £3,000

Typical yearly saving

£85

Potential rating after completing steps 1 to 5

60 D

Step 6: Solar water heating

Typical installation cost

£4,000 - £6,000

Typical yearly saving

£38

Potential rating after completing steps 1 to 6

61 D

Step 7: Solar photovoltaic panels, 2.5 kWp

Typical installation cost

£3,500 - £5,500

Typical yearly saving

£342

Potential rating after completing steps 1 to 7

73 C

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name	Paul Clarke
Telephone	07900923567
Email	p.clarke@encertsolutions.com

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme	Elmhurst Energy Systems Ltd
Assessor's ID	EES/015680
Telephone	01455 883 250
Email	enquiries@elmhurstenergy.co.uk

About this assessment

Assessor's declaration	No related party
Date of assessment	13 November 2019
Date of certificate	13 November 2019
Type of assessment	▶ RdSAP

Other certificates for this property
