

# Energy performance certificate (EPC)

|                                                         |                           |                                                     |
|---------------------------------------------------------|---------------------------|-----------------------------------------------------|
| 128 Station Road<br>Ystradgynlais<br>SWANSEA<br>SA9 1PL | Energy rating<br><b>G</b> | Valid until: <b>17 June 2036</b>                    |
|                                                         |                           | Certificate number: <b>9632-3063-2206-9416-6200</b> |

**Property type** Semi-detached house

**Total floor area** 92 square metres

## Rules on letting this property

### You may not be able to let this property

This property has an energy rating of G. It cannot be let, unless an exemption has been registered. You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Properties can be let if they have an energy rating from A to E. You could make changes to [improve this property's energy rating](#).

## Energy rating and score

This property's energy rating is G. It has the potential to be E.

[See how to improve this property's energy efficiency.](#)

The graph shows this property’s current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

# Breakdown of property’s energy performance

## Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property’s age and type. They are used for features the assessor could not inspect.

| Feature | Description                                    | Rating    |
|---------|------------------------------------------------|-----------|
| Wall    | Sandstone, as built, no insulation (assumed)   | Very poor |
| Wall    | Solid brick, as built, no insulation (assumed) | Very poor |
| Roof    | Pitched, 100 mm loft insulation                | Average   |
| Roof    | Pitched, no insulation                         | Very poor |

| Feature              | Description                                 | Rating    |
|----------------------|---------------------------------------------|-----------|
| Window               | Mostly double glazing                       | Average   |
| Main heating         | Room heaters, dual fuel (mineral and wood)  | Very poor |
| Main heating control | No thermostatic control of room temperature | Poor      |
| Hot water            | Gas multipoint                              | Average   |
| Lighting             | Below average lighting efficiency           | Poor      |
| Floor                | Solid, no insulation (assumed)              | N/A       |
| Air tightness        | (not tested)                                | N/A       |
| Secondary heating    | Room heaters, mains gas                     | N/A       |

## Primary energy use

The primary energy use for this property per year is 866 kilowatt hours per square metre (kWh/m<sup>2</sup>).

► [About primary energy use](#)

## Additional information

Additional information about this property:

- **PV recommended**  
When considering the PV installation consider installing PV battery and a PV diverter for water heating.
- Stone walls present, not insulated

## Smart meters

This property had **no smart meters** when it was assessed.

Smart meters help you understand your energy use and how you could save money. They may help you access better energy deals.

[Find out how to get a smart meter \(https://www.smartenergygb.org/\)](https://www.smartenergygb.org/)

## How this affects your energy bills

An average household would need to spend **£6,202 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £2,966 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2026** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

---

## Heating this property

Estimated energy needed in this property is:

- 24,181 kWh per year for heating
- 2,063 kWh per year for hot water

## Impact on the environment

This property's environmental impact rating is E. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO<sub>2</sub>) they produce each year.

## Carbon emissions

|                                             |                               |
|---------------------------------------------|-------------------------------|
| <b>An average household produces</b>        | 6 tonnes of CO <sub>2</sub>   |
| <b>This property produces</b>               | 7.3 tonnes of CO <sub>2</sub> |
| <b>This property's potential production</b> | 3.9 tonnes of CO <sub>2</sub> |

You could improve this property's CO<sub>2</sub> emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

# Steps you could take to save energy

► [Do I need to follow these steps in order?](#)

## Step 1: Increase loft insulation to 270 mm

Typical installation cost £900 - £1,200

Typical yearly saving £360

Potential rating after completing step 1

6 G

## Step 2: Flat roof or sloping ceiling insulation

Typical installation cost £900 - £1,200

Typical yearly saving £210

Potential rating after completing steps 1 and 2

8 G

## Step 3: Internal wall insulation

Typical installation cost £7,500 - £11,000

Typical yearly saving £1,932

Potential rating after completing steps 1 to 3

31 F

## Step 4: Floor insulation (solid floor)

Typical installation cost £5,000 - £10,000

Typical yearly saving £276

Potential rating after completing steps 1 to 4

35 F

## Step 5: Draught proofing

Typical installation cost £150 - £250

Typical yearly saving £84

Potential rating after completing steps 1 to 5

36 F

## Step 6: Low energy lighting

Typical installation cost £270 - £315

Typical yearly saving £29

Potential rating after completing steps 1 to 6

36 F

## Step 7: High performance external doors

Typical installation cost £1,800 - £2,400

Typical yearly saving £77

Potential rating after completing steps 1 to 7

38 F

## Step 8: Solar photovoltaic panels, 2.5 kWp

Typical installation cost £8,000 - £10,000

Typical yearly saving £214

Potential rating after completing steps 1 to 8

41 E

## Who to contact about this certificate

### Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

|                        |                                                                  |
|------------------------|------------------------------------------------------------------|
| <b>Assessor's name</b> | Colin Tait                                                       |
| <b>Telephone</b>       | 01792 865042                                                     |
| <b>Email</b>           | <a href="mailto:pontardawe@ctf-uk.com">pontardawe@ctf-uk.com</a> |

### Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.
